

PRODUCT INFORMATION

PROMIX[®] 420

APPLICATION: Process aid for most synthetic rubbers especially EPDM.

COMPOSITION: Blend of fatty acids, fatty ester and fatty alcohols.

TYPICAL CHARACTERISTICS

APPEARANCE: White pastilles

SOFTENING POINT: Performance: 85° - 95° C

ACID VALUE: Less than 35

PHYSIOLOGICAL DATA: Refer to Material Safety Data Sheet

DISCOLORATION: None

STORAGE STABILITY: Minimum of one year under normal conditions

PACKAGING: 25 kg. polyethylene bags

RECOMMENDED USE: 2 - 5 phr. Add with the first addition of fillers.

ADVANTAGES

Reduces viscosity
Improves flow and release properties
Improves extrusion rate and profile
Improves molded part definition

Created: August 2, 2002/PROMIX.420ZS
