

PRODUCT INFORMATION

PROMIX[®] 725

APPLICATION: A general purpose processing aid for blending moderately dissimilar elastomers.

COMPOSITION: Polymeric resin blend.

TYPICAL CHARACTERISTICS

APPEARANCE: Dark brown pellets

SPECIFIC GRAVITY: Approximately 1.06

SOFTENING POINT: 95° ± 5 C

% EVAPORATION LOSS: 0.5% maximum
(@ 105°C for 2 hours)

SOLUBILITY: Soluble in aromatic solvents

ASH CONTENT: 2.5% maximum

STORAGE STABILITY: Minimum of one year under normal conditions

PACKAGING: 25 kg polyethylene bags

RECOMMENDED USE: 6 - 15 phr. Add with first addition of fillers.

ADVANTAGES

Excellent wetting agent to decrease mixing time of fillers.
Improves general processing properties of highly-filled synthetic and natural elastomer compounds.
Improves compatibility in multiple polymer systems.

Revised: March 10, 1998/PROMIX.725
